WELCOME TO THE WORLD OF GERFLOR...

We are a manufacturer of retail design-led flooring collections that are both award winning and are perfectly suited to a host of applications in the retail environment.

Our fast track innovations demonstrate that there really is no need to close a retail premises when a new or replacement floor is required. We fully understand that from luxury boutiques to supermarkets, flooring can play a pivotal role in creating a complimentary backdrop to a retailer's goods, alongside providing an inviting environment that is enticing to customers.

We have developed a wide range of products that can adapt to the pace of this fast-changing industry in terms of both cost-effective installations and meeting the latest decorative trends. High street retailers, supermarkets, DIY shops, convenience stores and forecourt traders may all have different briefs but advancements in technology provide a wider choice of floorings for retail commercial facilities.

Our solutions cater for all needs and to suit both short-term and long-term budgets, and for many areas across a retail environment including both front and back of house applications. Enabling and assisting with this 'competitive retail edge' is key to Gerflor's overall success in this sector, as is providing products that will enable retail outlets to remain open during a refurbishment and therefore reducing the retailers' financial loss to an absolute minimum.

Gerflor vinyl flooring systems offer excellent light reflective values which can positively help how lighting is needed and used within interior spaces for retail locations. When design, performance, acoustics, good slip-resistance, waterproofing, sustainability and value all matter, you can count on us to provide you with vinyl flooring solutions that are developed to meet the diversity of your retail location.

PROVIDING FLOORING SOLUTIONS FOR RETAIL

FAST TRACK AND DESIGN-LED FLOORING SOLUTIONS

BENEFITS

Includes loose-lay fast track products so no closures

Quick and easy to maintain and can be replaced in minutes

Improves user comfort, noise and slip risk is reduced

Create zones, custom way finding and safety logos

Can withstand both heavy pedestrian and mechanical traffic

SPECIALIST LOOSE-LAY TILES (GTI MAX & ATTRACTION®)

By installing loose-lay vinyl flooring systems, retailers can benefit from limited disruption to their operations, avoid closure for the 24 hours or more needed to install traditionally adhered floorings and, importantly, minimise loss of profits. Combining design with high resistance, these systems have been specifically developed for fast track renovation and utilise advanced interlocking technology to provide rapid, clean, cost-effective installation, without the need for adhesive or specialist tools. Crucially, they can be laid over most existing smooth floors (even ceramic tiles) with minimal preparation to the subfloor. Plus, as adhesive is eliminated, there is no need to factor in drying times which has a positive effect on downtime, the environment and potential loss of turnover.

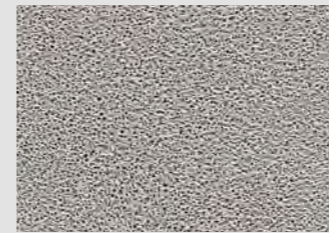

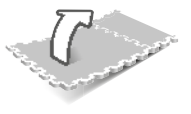

NO NEED TO CLOSE YOUR PREMISES

The GTI Max and Attraction® specialist technical tile ranges are quick and easy to install and maintain, making them perfect for fast track renovations. They are tried and tested for the harshest applications and can withstand heavy traffic. They have a patented interlocking construction and can be laid with minimal disruption to your site.

- Fast loose-lay installation allowing the area to remain open
- Clean installation and there is no adhesive or dust
- A 2 person team can install up to 200m² in 8 hours

EASY INSTALLATION & REPLACEMENT

Resin

Tiles

Concrete

Wet Surfaces
- up to 7% humidity / 92% RH

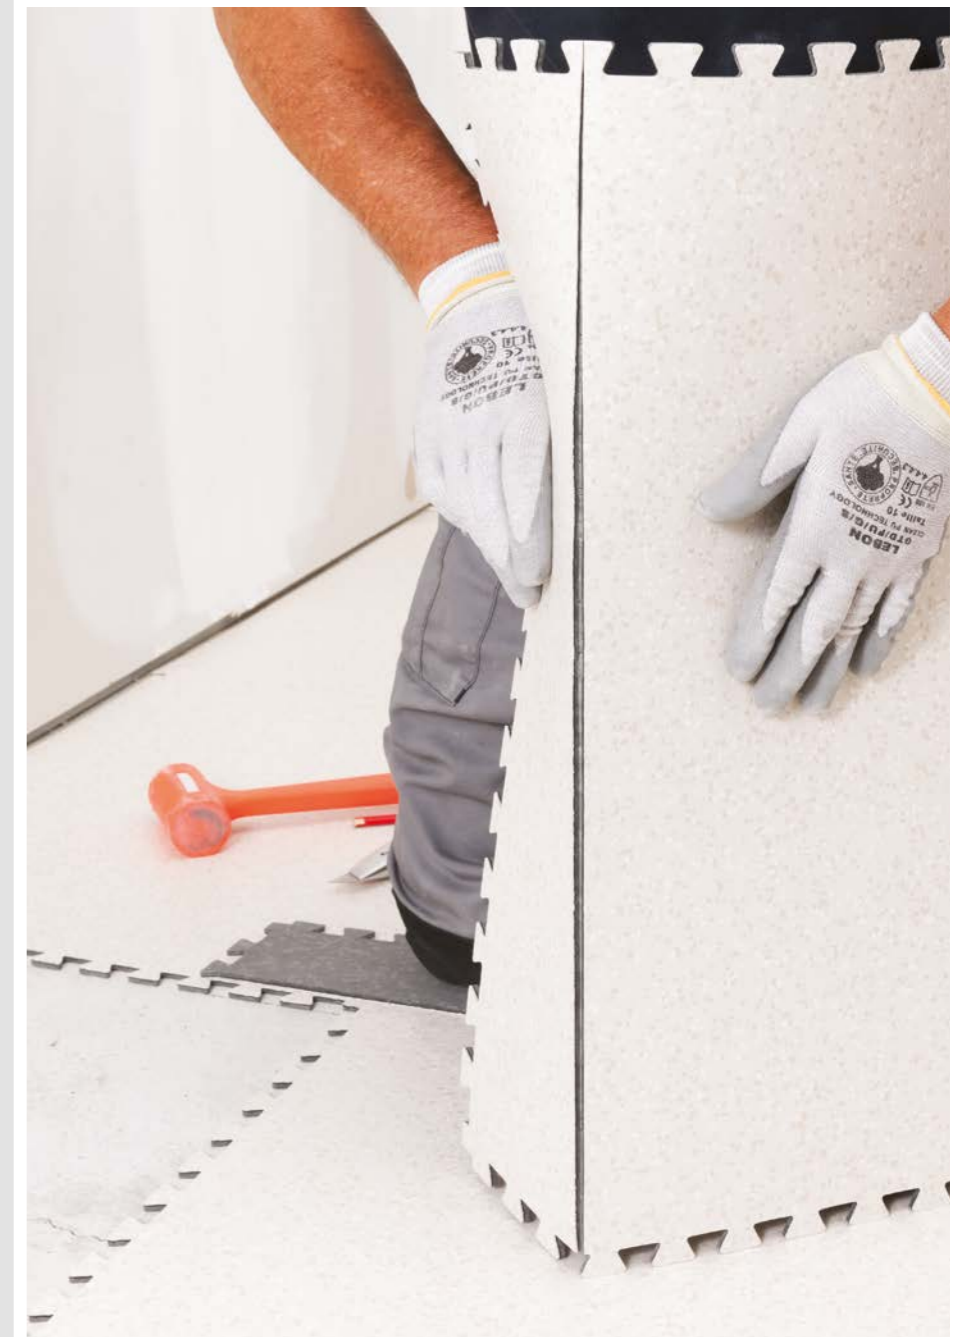

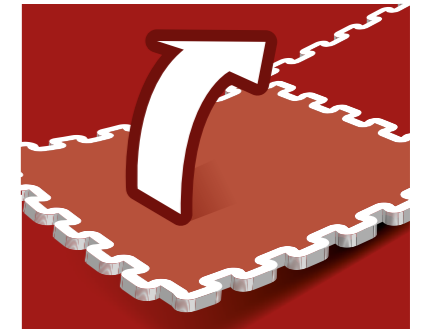

Asbestos Surfaces

INSTALLATION ON MOST SURFACES

The specialist technical tile systems offer extremely fast loose-lay installation. You can even keep your retail location open during renovation, meaning no lost revenue.

If a tile ever needs to be replaced, the interlocking design allows for replacement of individual tiles in a matter of minutes.

SLIP-RESISTANCE & NOISE REDUCTION

Slips and falls are a common concern in retail locations. Our systems provide superior slip-resistance compared to other commonly used hard-surface flooring options. With the embossed surfaces, you can be confident that your customers will have a safer shopping experience.

There are also the acoustic benefits vs. other hard-surface flooring options, where our technical tiles reduce the noise of foot and rolling traffic.

19dB less noise than tiling when users walk on it

Underfoot comfort and reduces fatigue

More slip-resistant than other types of surface (R10 rated)

4 x less hazardous than tiling in the head impact assessment (Standard 1177: head impact - 66 cm vs. 10 cm)

USER COMFORT & SAFETY

ZONING & BRANDING

The specialist technical tiles with their interlocking design and colour range offer the ability to create zones within your retail space. In addition, these can be used for custom way finding, safety, and logo floor signage.

- Create your logo using our water jet cutting system.
- The logo is produced using the finished product.
- Withstands intensive footfall without fading.

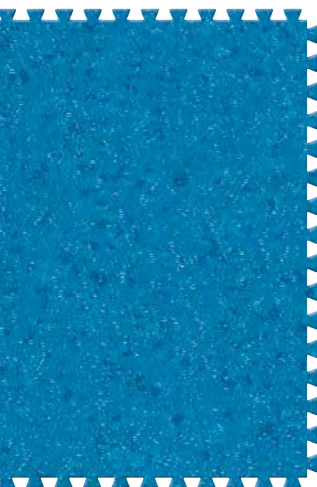

GTI MAX: THE ULTIMATE FLOORING INNOVATION

The GTI interlocking loose-lay tile is the most advanced flooring solution you can find on the market with the hard wearing durability that retail applications command. From heavy foot and cart traffic to pallet jacks and forklifts, GTI Max's state of the art construction allows it to take a beating and still carry on looking great!

The GTI Max range is already the flooring choice of many of the worlds' top retailers with over 100 million m² installed in retail applications worldwide.

 **AS HARD-WEARING AS CERAMIC TILES, WITHOUT THE ISSUES**

Tried and tested in the harshest retail applications. GTI Max's unique and advanced design allows it to withstand the heaviest traffic.

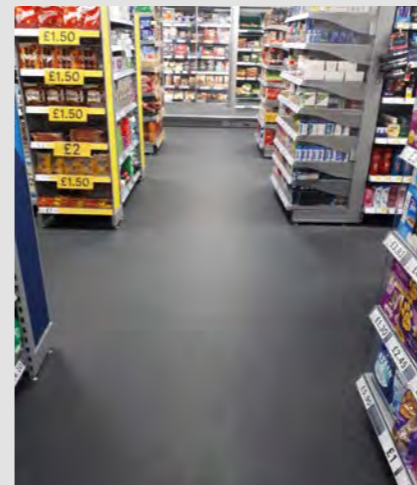

The patented, interlocking design, with two glass fibre grids either side a 4 mm thick recycled interlayer, provide extreme dimensional stability against rolling loads. Densely pressed colour chips throughout the 2 mm thick, pure colour wearlayer hide scratches and provide the best wear resistance.

Tiles triple pressed at over **3000 T**

2 mm wearlayer

This specialist chemical formulation provides excellent cleaning characteristics and an improved resistance to scratching, it significantly delays the application of wax and provides an unrivalled level of resistance to the harshest of chemicals.

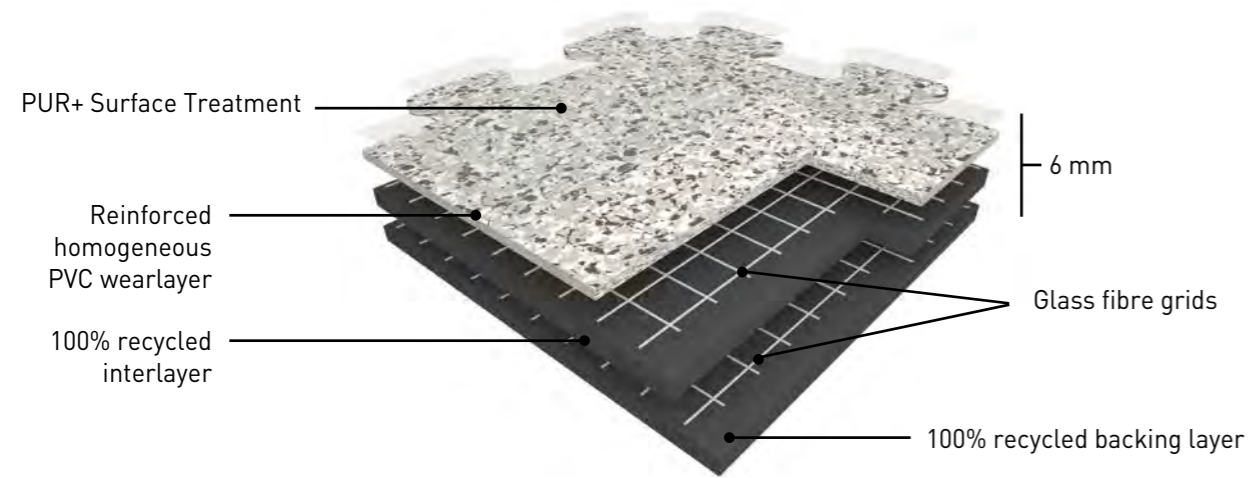

PUR+ SURFACE TREATMENT
ENABLING EASY MAINTENANCE

EASY MAINTENANCE

The patented interlocking design with two glass fibre grids either side a 4 mm thick recycled interlayer, provides extreme dimensional stability against rolling loads. The densely pressed colour chips throughout the 2 mm thick pure colour wearlayer hides scratches and provides an outstanding wear resistance. The highly durable PUR+ surface treatment makes maintenance a breeze.

TECHNICAL DETAILS

GTI MAX

GTI Max is a multi-layered interlocking loose-lay vinyl tile with a polyurethane surface treatment (PUR+). It is 6 mm thick with a dovetail joint and rated as abrasion group T. GTI Max is manufactured using a continuous and exclusive high pressure process.

GTI Max is reinforced with 2 glass fibre grids on either side of an intermediate pressed homogeneous layer. Its wearlayer is reinforced by specific oblong fillers that offer an outstanding resistance to traffic. GTI Max's backing layer is a 4 mm thick black pressed homogeneous sheet, its surface is a coloured and reinforced homogeneous sheet 2 mm thick.

GTI Max is 100% recyclable and made with up to 80% recycled content.

Recycled content is 100% REACH compliant.

GTI MAX

- Resistant to heavy traffic
- Fast renovation and can be installed over most floorcoverings
- No subfloor preparation, no adhesive and no production stoppage (no loss of revenue)
- Polyurethane surface treatment PUR+ for ease of maintenance
- 23 standard colours, mix and match colours to create corners and walkways

ALL THE BENEFITS OF PROTECSOL® **AND MUCH MORE!**

PROTECSOL® 2 technology combines all the benefits of Protecsol®, a solution that has been tested and approved for over 20 years: easy to maintain, no metallisation for life, saves on water and detergents with **2 additional benefits:**

1. STAIN SHIELD EVEN FOR THE MOST STUBBORN STAINS

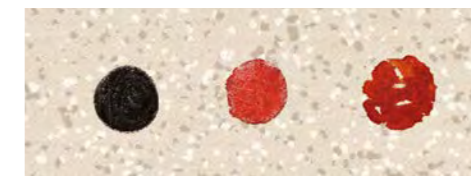

The waterproofing effect of **PROTECSOL® 2** prevents any infiltration of staining agents (alcoholic Eosin and Betadine, hydro-alcoholic gels, etc.) so these remain on the surface.

All other products on the market allow staining agents to infiltrate the flooring.

TECHNICAL DETAILS

ATTRACTION®

Attraction® is a semi-flexible tile constructed by compacting, at high temperature and over 3000 T, a 4 mm recycled backing and a 1mm pure vinyl wearlayer. This wearlayer incorporates very densely pressed coloured chips, with a matt finishing and without a transparent wearlayer.

The product comprises a compact backing which is pressed and reinforced with two glass fibre grids. Attraction® has a unique dovetail joint which allows fast loose-lay installation and replacement. Attraction® is treated with Proctecsol®2, a surface treatment obtained by UV laser crosslinking.

This Proctecsol®2 ensures easy maintenance and eliminates permanently the need for acrylic emulsion (metallisation). It avoids staining of chemical products used in healthcare like iodine alcohol, Betadine, eosin and anti-bacterial hand gel. It has a Bfl-s1 fire classification in accordance with standard EN 13501-1. The products emission rate of volatile organic compounds is <math><10\mu\text{g}/\text{m}^3</math> (TVOC after 28 days – ISO 16000-6).

Attraction® is 100% recyclable and made with up to 80% recycled content.

Recycled content is 100% REACH compliant.

Attraction®

- Tough and durable, suitable for high traffic retail environments
- Fast track interlocking tiles for fast installation and removal
- Low maintenance due to Proctecsol®2 surface treatment

TECHNICAL DETAILS

CREATION 70 DRYBACK

Creation 70 Dryback range is a popular choice for both public and commercial areas that are designed for high traffic wear including retail, hotels, hospitality, as well as many other market sectors.

The range includes unique and realistic brand new wood, stone and mineral effect designs (thanks to a large variety of sizes and embossing) many of which are exclusive to Gerflor. Available in 62 designs and in 9 different sizes with many designs having bevelled edges and embossed finishes for added realism.

Creation 70 Dryback

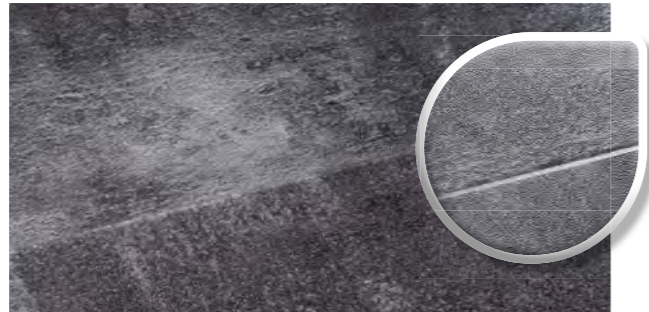

- Suitable for high traffic retail environments
- Bevelled edges for added realism
- Low maintenance due to Polyurethane (PUR+) surface treatment

CREATION 70 CLIC LVT

Faster & easier installation

- Faster installation: 17% more square feet installed per hour compared to laminate
- Installation is possible on top of most existing types of flooring
- Can be installed with up to 10lbs moisture content or 92% RH
- No need to close the premises, so no loss of revenue

100% water resistant

Better acoustic comfort
12dB more noise reduction from foot traffic compared to laminate

Easy install and for reduced noise during installation, install with a roller

CREATION 70: CLIC LVT

The Creation 70 Clic LVT System is a Luxury Vinyl Tile (LVT) and Luxury Vinyl Plank (LVP) system, with clever innovative interlocking technology that makes it fast to install, requires no adhesives and provides a range of inspiring finishes for any interior space.

You can save time and money as it is a fast track, Loose-lay, clean & dry installation. There is no need to close down the premises as the products can be installed with minimum disruption and over most floor finishes or imperfect sub floors. It is waterproof as it resists leaks and spillages that can damage wood based products.

TECHNICAL DETAILS

CREATION 70 CLIC LVT

Get the warmth of wood or the sophisticated look of concrete without the hassle and maintenance concerns. Gerflor's Creation Clic System is the industry's only commercial application 6 mm thick, vertically interlocking LVT. It's made with a tear-resistant, printed design film, protected by a transparent 0.7 mm wearlayer, which is pressed and grained at high pressure on a compact 100% recycled backing.

It incorporates duo core technology - the resilient comfort core improves noise absorption and provides comfort underfoot whilst its rigid core contains fibre glass for dimensional stability.

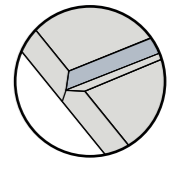

Creation Clic is one of the only interlocking systems on the market that's proven to resist retail and commercial foot traffic as well as shopping carts. Our PUR+ polyurethane surface treatment provides no wax, easy maintenance.

Creation 70 Clic LVT

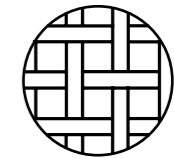

- Interlocking planks that can be laid without adhesive
- All Minerals available in 391 mm x 729 mm tiles
- Woods available in 2 different sizes
- Revolutionary vertical click system, easy fitting and replacement
- Low maintenance due to Polyurethane (PUR+) surface treatment

Easily removable:
renovation

CREATION 70: LOOSE-LAY LVT

The Creation 70 Loose-lay LVT system offers design led flooring for high traffic areas with the convenience of a Loose-lay installation. Enhanced embossing and bevelled edges deliver ultra-realistic designs and its resilient comfort core technology ensures noise absorption and comfort underfoot, ideal for retail spaces.

Creation 70 Loose-lay is 6 mm thick, making it the same as Creation 70 Clic and GTI Max, allowing it to be mixed and matched with these products for ultimate design flexibility.

TECHNICAL DETAILS

CREATION 70 LOOSE-LAY

All the design aesthetics of wood, minerals and textiles without the hassle and maintenance concerns. Creation 70 Loose-lay allows a quick and easy installation and coupled with its 0.7 mm wear layer is perfect for high traffic retail applications.

It incorporates duo core technology - the resilient comfort core improves noise absorption and provides comfort underfoot whilst its rigid core contains fibre glass for dimensional stability. Creation 70 Loose-lay's grip weave backing provides strong suction to the subfloor and improves sound absorption. It is 6 mm thick, the same as Creation 70 Clic and GTI Max, allowing more mix and match options. The PUR+ surface treatment makes maintenance a breeze.

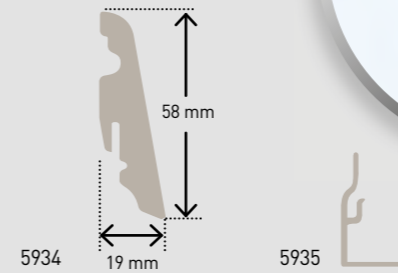

Creation 70 Loose-lay

- All woods available in 229 mm x 1220 mm planks
- Textile and mineral designs available as tiles
- Loose-lay format for quick and easy installation
- Mix and match options with Creation 70 Clic and GTI Max
- Low Maintenance due to Polyurethane (PUR+) surface treatment

CREATION 55 DRYBACK LVT

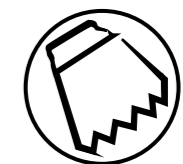

Surface treatment for easy maintenance and no wax

0.55 mm
WEARLAYER

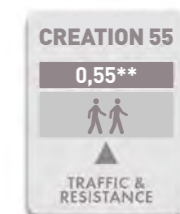

Adapted to medium traffic applications

Tough and durable compact flooring

Permanent adhesive installation

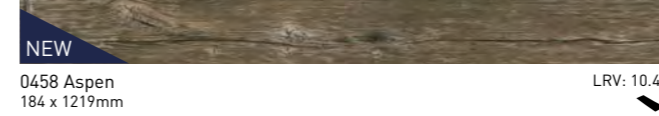

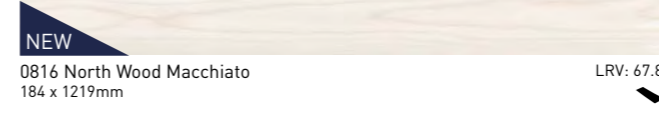

Medium foot traffic resistant

CREATION 55: DRYBACK LVT

The design-led Creation 55 collection of Luxury Vinyl Tiles (LVT) and Luxury Vinyl Planks (LVP) combine exquisite looks with fantastic performance and are perfect for medium traffic retail applications. With additional cushioning for less impact and a softer feel, as well as acoustic features to absorb more noise when compared with tile, wood and laminate, they are a tried and tested solution for retail front of house.

CREATION 55 DRYBACK LVT: DESIGN

TECHNICAL DETAILS

CREATION 55 DRYBACK LVT

The Creation 55 Dryback range is a popular choice for medium traffic retail and commercial applications. Recently updated, the new range offers 77 references across wood, mineral and textile designs in a variety of sizes and embossing finishes, many of which are exclusive to Gerflor. Many designs have bevelled edges for an ultra realistic effect.

Creation 55 Dryback incorporates duo core technology - the resilient comfort core improves noise absorption and provides comfort underfoot, whilst its rigid core contains fibre glass for dimensional stability.

Creation 55 Dryback LVT

- Suitable for medium traffic retail environments
- Bevelled edges for added realism
- Low maintenance due to Polyurethane (PUR+) surface treatment

CREATION 55: CLIC LVT

The design-led Creation 55 collection of Luxury Vinyl Tiles (LVT) and Luxury Vinyl Planks (LVP) combine exquisite looks with fantastic performance and are perfect for medium traffic retail high street applications.

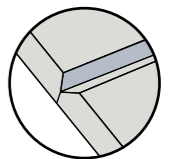

With additional cushioning for less impact and a softer feel, as well as acoustic features to absorb more noise when compared with tile, wood and laminate, they are a tried and tested solution for retail front of house.

CREATION 55 CLIC LVT

Faster & easier installation

- Faster installation: 17% more square feet installed per hour compared to laminate
 - Installation is possible on top of most existing types of flooring
- Can be installed with up to 10lbs moisture content or 92% RH
- No need to close the premises, so no loss of revenue

Structured emboss & bevel

100% water resistant

Better acoustic comfort 12dB more noise reduction from foot traffic compared to laminate

Easy install and for reduced noise during installation, install with a roller

TECHNICAL DETAILS

CREATION 55 CLIC LVT

Get the warmth of wood or the sophisticated look of concrete without the hassle and maintenance concerns. Gerflor's Creation Clic System is a 5 mm thick, vertically interlocking LVT. It's made with a tear-resistant, printed design film, protected by a transparent 0.55 mm wearlayer, which is pressed and grained at high pressure on a compact 100% recycled backing.

Creation Clic is the only interlocking system on the market that's proven to resist retail and commercial foot traffic as well as shopping carts. Our PUR+ polyurethane surface treatment provides no wax, easy maintenance.

Creation 55 Clic LVT

- Interlocking planks and tiles that can be laid without adhesive
- Woods available in 2 plank sizes including and XL 242 mm x 1461 mm version
- All designs available as 391 mm x 729 mm tiles
- Revolutionary vertical clic installation
- Low maintenance due to Polyurethane (PUR+) surface treatment

CREATION 55 LOOSE-LAY LVT

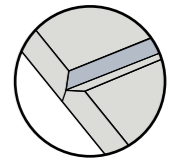

CREATION 55: LOOSE-LAY LVT

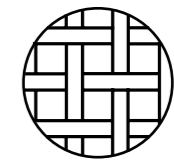

The Creation 55 loose-lay LVT system offers design led flooring for medium traffic areas with the convenience of a loose-lay installation. Enhanced embossing and bevelled edges deliver ultra-realistic designs and its resilient comfort core technology ensures noise absorption and comfort underfoot, ideal for retail spaces.

The Creation 55 loose-lay size format and design range allows it to be mixed and matched both within the loose-lay range and with Creation 55 Clic, for ultimate design flexibility.

You can save time and money as it is a fast track, loose-lay, clean & dry installation. There is no need to close down the premises as the products can be installed with minimum disruption and over existing floor finishes or imperfect sub floors.

TECHNICAL DETAILS

CREATION 55 LOOSE-LAY LVT

All the design aesthetics of wood, minerals and textiles without the hassle and maintenance concerns. Creation 55 Loose-lay allows a quick and easy installation and coupled with its 0.55 mm wear layer is perfect for many medium traffic retail and commercial applications.

It incorporates duo core technology - the resilient comfort core improves noise absorption and provides comfort underfoot whilst its rigid core contains fibre glass for dimensional stability. Creation 55 Loose-lay's grip weave backing provides strong suction to the subfloor and improves sound absorption.

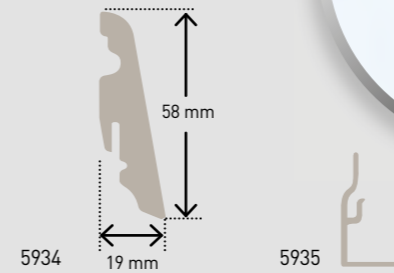

Its size formats allow creative mix and match options. The PUR+ surface treatment makes maintenance a breeze.

Creation 55 Loose-lay LVT

- All woods available in 229 mm x 1220 mm planks
- Textile and mineral designs available as 500 mm x 500 mm tiles
- Loose-lay format for quick and easy installation
- Mix and match options
- Low maintenance due to Polyurethane (PUR+) surface treatment

TARALAY IMPRESSION CONTROL: THE NATURAL CHOICE

The Taralay Impression Control range consists of a Safety in Wood and a Safety in Design offer.

This collection is ideal for hardworking places and has been developed specifically for an extensive range of contract applications. If you're looking for inspiration and a tough safety flooring that offers both slip resistance and outstanding performance, then look no further.

A decorative vinyl sheet flooring collection with design-led colourways, it is suitable for healthcare, education, retail, public spaces, offices and other commercial interiors. It also offers a hygienic solution thanks to a revolutionary UV cured PUR surface treatment for easy cleaning and maintenance.

TARALAY IMPRESSION CONTROL

Slip-resistant to
HSE standards

R11 rating,
moderate to low
slip risk

A surface roughness of 20
microns indicates a low
slip risk in wet conditions

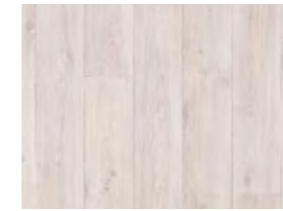

A revolutionary UV cured PUR
surface treatment for easy
maintenance and no wax

Tough and durable
compact flooring

TECHNICAL DETAILS

TARALAY IMPRESSION CONTROL

The stunning Taralay Impression Control range was voted CFJ/CFA Product of the Year at the 2016 Flooring Industry Awards. It is a decorative vinyl safety sheet flooring collection with design-led colourways. It offers a hygienic solution thanks to a revolutionary UV cured PUR surface treatment for easy cleaning and maintenance.

Taralay Impression Control

- Tough and durable multipurpose floor covering
- Slip-resistant, easy to clean surface treatment (R11 rating)
- Stunning collection of modern and contemporary designs
- High performance, ideal for demanding retail environments

⁽¹⁾ The RRL pendulum test : wet is expressed as a pendulum test Value (PTV) and a Slip Resistance Value (SRV) to show that the test was carried out using a 4S rubber resistor pad in accordance HSE guidance (for longer lifetime sustainable wet resistance, please refer to Tarasafe ranges)

⁽²⁾ The implementation of an effective cleaning regime is the best defence against infection

TARASAFE GEO: VINYL SAFETY FLOORING

Tarasafe Geo is a high performance safety slip-resistance vinyl floor with a SparClean® surface treatment for an unrivalled level of stain and dirt resistance. A popular choice for those applications where slip-resistance, durability, hygiene and easy maintenance is required. Often installed in the retail back of house hardworking areas.

TARASAFE GEO

Extreme resistance to soiling and staining

Slip-resistant to HSE standards

R10 rating, moderate to low slip risk

A surface roughness of 20 microns indicates a low slip risk in wet conditions

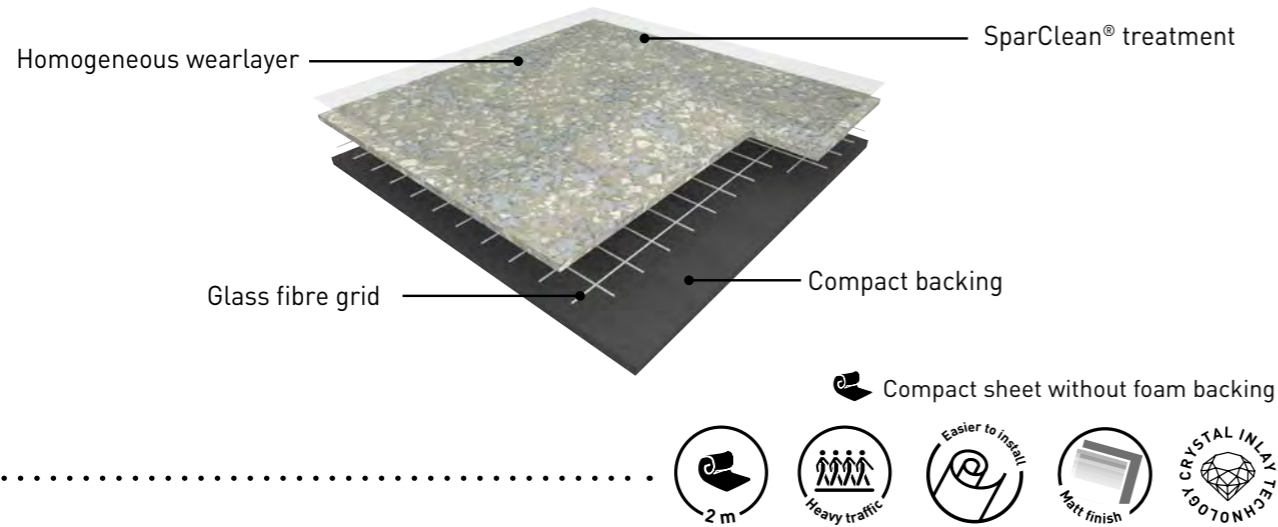

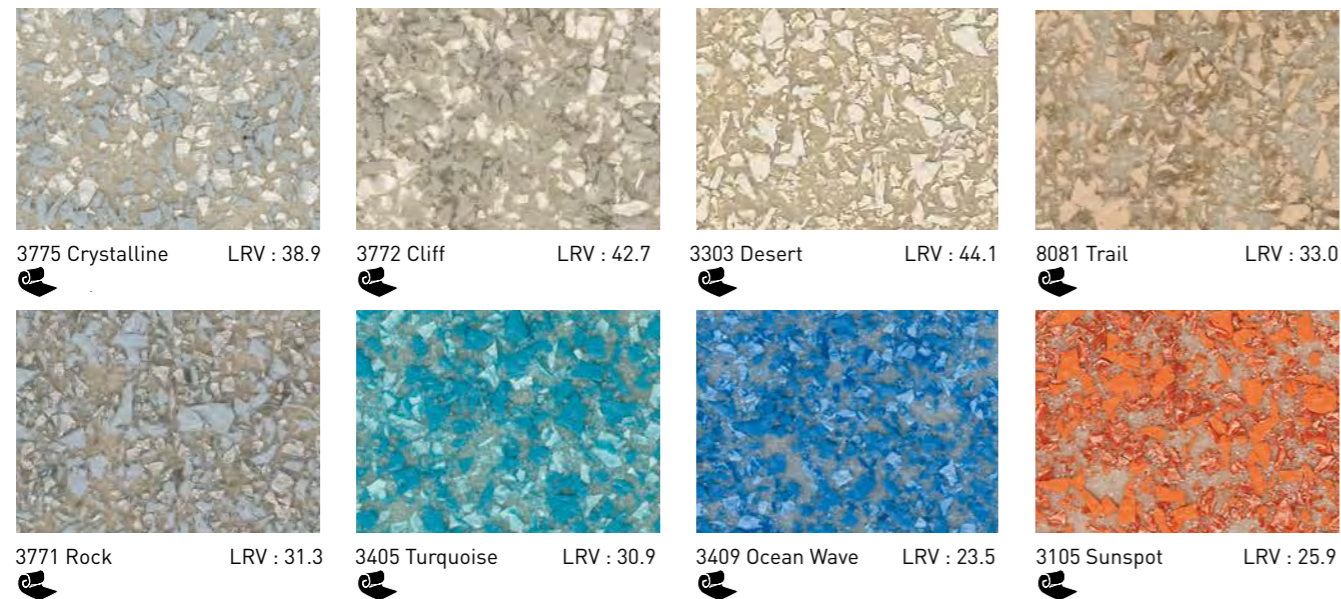

Easier to cut-up 5 times more blade life

High resistance to heavy traffic

COLOURS & TECHNICAL DETAILS

TARASAFE GEO

Tarasafe Geo is a slip-resistant vinyl floorcovering, with a PVC wearlayer and deeply inlaid mineral crystal particles and coloured chips for a decorative design. It is an ideal solution for traffic applications where enhanced slip-resistance and durability are required. Tarasafe Geo is suitable for most contract and commercial areas. It is eco-friendly, 100% recyclable, Floorscore® certified and does not contain any heavy metals or CMR 1&2, it is also 100% compliant with REACH.

The product emission rate of volatile organic compounds is $<100\mu\text{g}/\text{m}^3$ (TVOC after 28 days - ISO 16000-6). The SparClean® surface treatment improves the product performance in terms of stain and dirt resistance and designs last longer for extended durability.

Tarasafe Geo

- Easy to clean and maintain compacted nonporous surface
- Enhanced colour, design and brightness of mineral crystal particles
- Stain and chemical resistant SparClean® surface treatment, no polish for life!
- Maximum hygiene with bacteriostatic and fungistatic treatment

TARASAFE ULTRA: VINYL SAFETY FLOORING

Tarasafe Ultra is a range of slip resistant sheet flooring that meets HSE guidelines. It is constructed from vinyl with deeply inlaid mineral crystal particles (patent pending) and coloured chips for a decorative design. It contains no Carborundum and is reinforced with a glass fibre grid. Ideal for use in all areas of heavy traffic where slip-resistance, durability and hygienic conditions are required. Perfect for retail staff areas that require vibrant and contemporary colours.

TARASAFE ULTRA

Extreme resistance to soiling and staining

Slip-resistant to HSE standards

R10 rating, moderate to low slip risk

A surface roughness of 20 microns indicates a low slip risk in wet conditions

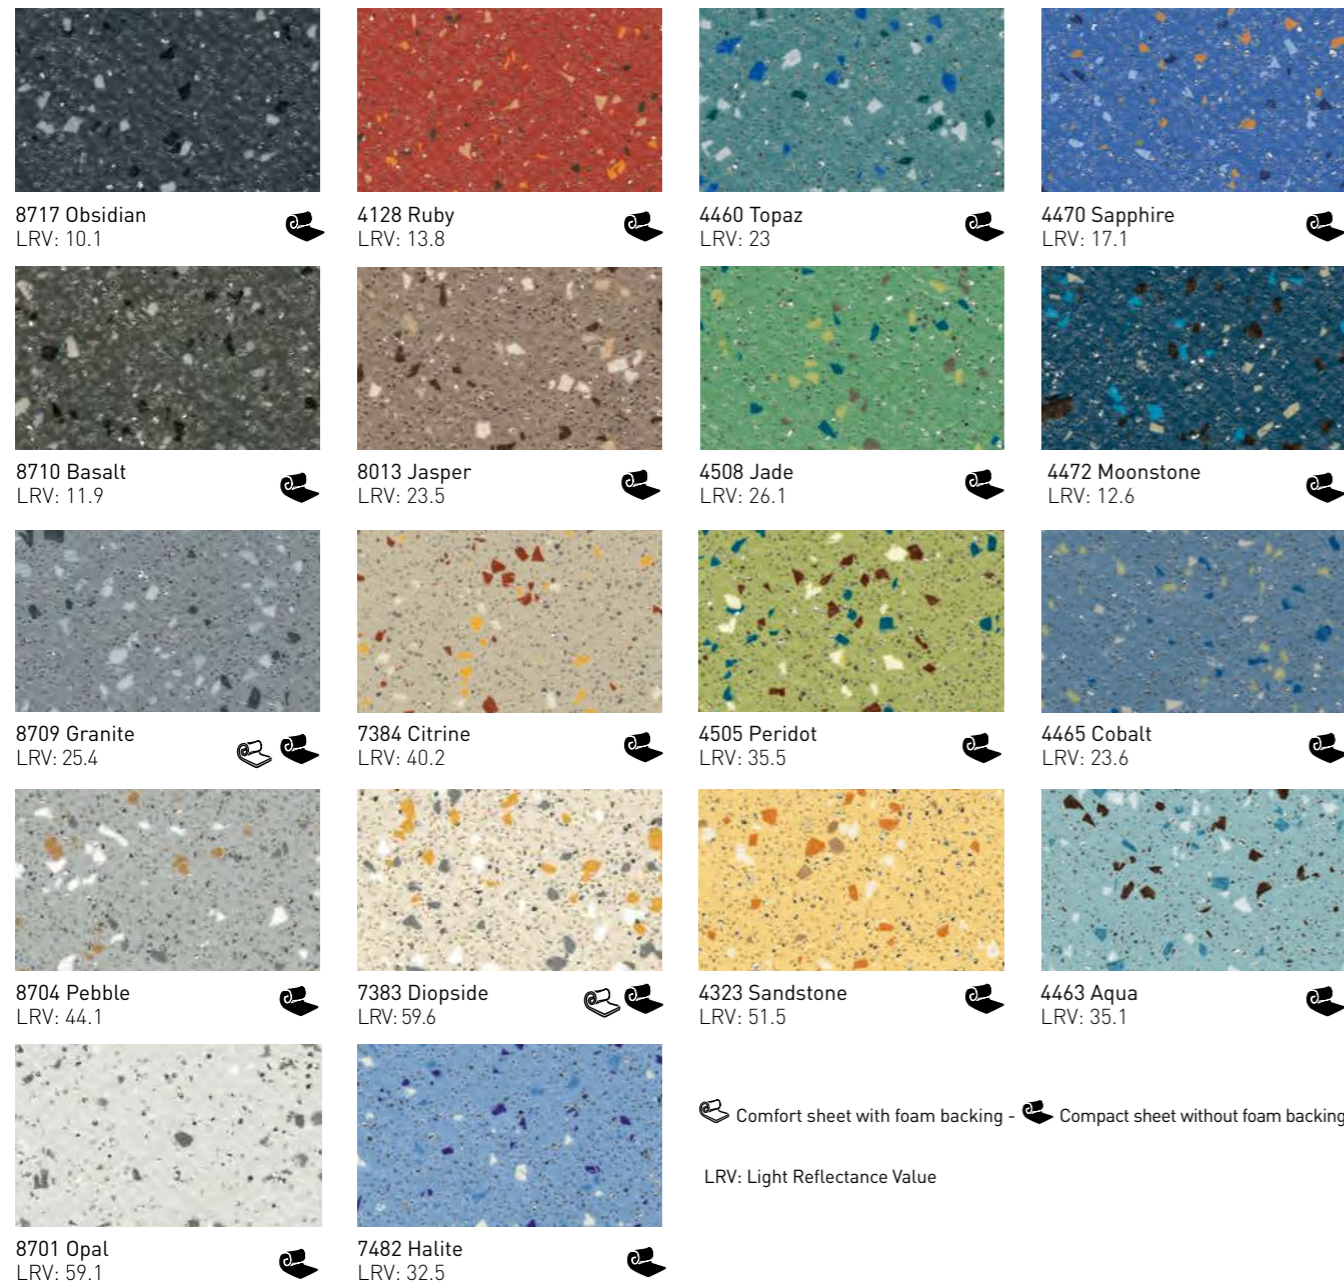

Easier to cut-up 5 times more blade life

High resistance to heavy traffic

INSTALLATION & MAINTENANCE

INSTALLATION PROCEDURES

Please refer to our installation techniques on www.gerflor.com

MAINTENANCE

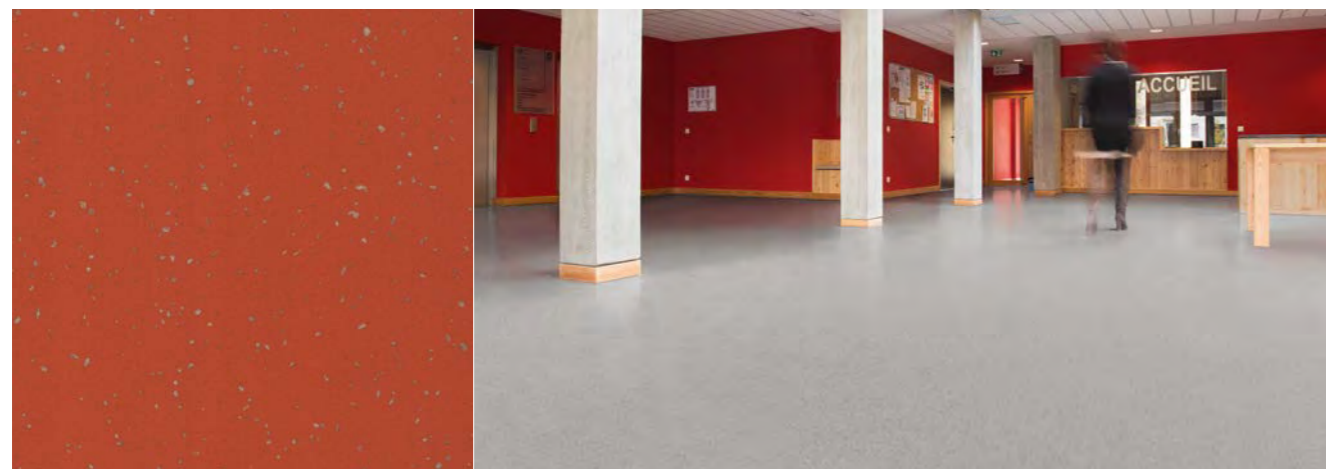

All the advantages of Protecsol® and more!

PROTECSOL®2 technology combines all the advantages of Protecsol®, tested and approved over 20 years ago: ease of maintenance, no need for wax and polish for life, water and detergent savings, plus two additional benefits:

1 The best stain shield

<p>Highly durable: Exclusive surface treatment applied by UV laser cross-linking provides superior durability and an even surface thickness, creating an impenetrable barrier against stains and chemicals</p> <p>Longer life expectancy.</p>	<p>BY GERFLOR</p> <p>GERFLOR: EVEN THICKNESS</p>	<p>OTHER TREATED FLOOR COVERING</p> <p>COMPETITOR: MISSING TREATMENT AND UNEVEN THICKNESS</p>
<p>Water-repellent effect: The surface treatment creates a 100% non-porous barrier to prevent all liquids and chemicals from penetrating the materials, remaining on the surface</p> <p>Simple and easy stain removal.</p>		

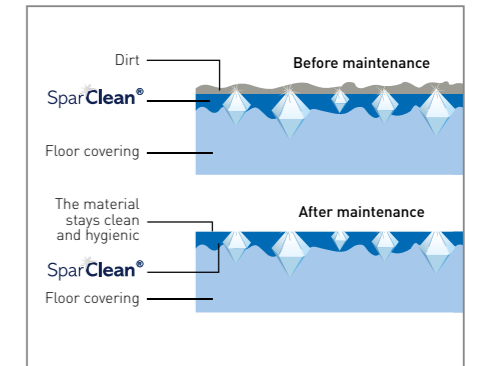

2 Matt effect for enhanced design

SparClean®

New generation of surface treatment for Tarasafe safety flooring.

SparClean® is a powder coated treatment that when heated forms a totally smooth surface between the mineral crystal particles, eliminating dirt traps and setting new standards for cleanliness and hygiene. The unique method of manufacture ensures that the slip resistance of the Tarasafe safety flooring is not impaired in any way, yet provides a safety floor that is easy to clean.

SparClean® is a permanent surface treatment that gives extreme resistance to soiling and staining, offers excellent resistance to chemicals and ensures long term product durability.

PUR

Polyurethane surface treatment.

PUR+ surface treatment provides excellent cleaning characteristics and improved resistance to scratching. It significantly delays application of wax and provides excellent resistance to chemicals.

Polyurethane surface treatment.

PUR surface treatment is a good foundation for routine maintenance and avoids the immediate use of an acrylic emulsion after installation.

WHO ARE WE?

Leadership in resilient flooring solutions

Gerflor is recognised as a specialist and a world leader in resilient flooring solutions. Gerflor group creates, manufactures and markets innovative, design-led and eco responsible solutions for flooring and complementary interior finishes. Already well-established in more than 100 countries, Gerflor is continuously developing its activities in new markets.

A multi-specialist group

Gerflor's main strength builds on specialisation in four key competencies within the broader market:

- Architecture
- Decoration
- Sport
- Technospecific

What makes us unique and strong comes from combining these competencies.

A committed and experienced team

Our most valuable resource is our people. Their enthusiasm and commitment to our customers' success is our main asset. Gerflor's employees are an essential part of the Gerflor brand experience. They are driven by well-established and often noted core values that make them entrepreneurial, approachable and respectful, with a sense of partnership.

A passion for customer success

Our brand is our promise and it grows through the positive experiences provided to stakeholders, particularly our customers and our employees around the world. We reaffirm that promise on a daily basis to anticipate and meet the specific needs of users, specifiers, installers and distributors wherever they may be. It also compels us to deliver total quality and competitiveness to ensure our customers' success in all their projects.

OUR MISSION STATEMENT:

To create, manufacture and market innovative, design-led and eco responsible solutions for flooring and complementary interior finishes.

To anticipate the specific needs of the users, specifiers, installers and distributors around the world.

To provide competitiveness and success for all our customers.

ECO RESPONSIBLE SOLUTIONS

COMPOSITION

- **100% REACH** compliant
- **FREE** of formaldehyde
- **FREE** of heavy metals
- **FREE** of solvent

INSTALLATION

- **Innovative adhesive free installation systems**

RECYCLED CONTENT

- **25%** average recycled content
- **100% REACH compliant** recycled content

LIFE CYCLE ANALYSIS

- **Eco-designed** according to a product specific Life Cycle Analysis
- **Product specific EPD** (Environmental Products Declaration) available
- **Manufactured in an ISO 14001 and ISO 50001** certified site
- **Contribution to many Green Building Schemes** (LEED, HQE, BREEAM...)
- **Exclusive surface treatments** to reduce drastically the use of chemical product and water and ensure the lowest environmental impact

RECYCLING

- **100% recyclable product**

INDOOR AIR QUALITY

- **TVOC emissions 10 times better than norms requirements** (TVOC < 100 µg/m³ after 28 days)
- **TVOC < 10ug/m³ after 28 days** for all products treated Evercare™ / Protecsol®2
- **Floorscore certified**
- **M1 certified**
- **Comply with AgBB protocol**
- **No formaldehyde emission**

WELLNESS

- **Health:** Antibacterial activity (inhibits growth > 99%)
- **Safety:** Anti slip performance
- **Comfort:** Walking comfort and impact noise reduction

CONTRIBUTING TO GREEN BUILDING CERTIFICATION

LEED (Leadership in Energy and Environmental Design) certification

Issued by the USGBC (US Green Building Council), this confirms that a building or a community has been designed and constructed using strategies to improve performance by saving energy, treating water, reducing CO₂ emissions, and improving indoor air quality. Our floorings contribute to building certifications (3 levels of certification: silver, gold, platinum) because:

- Low VOC emission (Floorscore® compliant)
- High recycled content
- Product specific EPD (Environment Product Declaration)

INTERIOR DESIGNER

At Gerflor we believe in bringing you more, which is why our online services and solutions are dedicated to helping you choose the right flooring for your project. So, instead of using guesswork, use our online Interior Designer to experience the overall effect of our flooring in a room setting.

It couldn't be easier to use our interior designer service to make sure that you've made the right choice: simply select an image from our gallery or upload your own image* of any room, whether a hospital, school, office, shop or home, select a Gerflor flooring and visualise the results.

You can save, print or add to your favourites.

Go to www.gerflor.co.uk / www.gerflor.ie, click **CONTRACT** then **SERVICES** at the top of the page then **INTERIOR DESIGNER** and give it a try!

* A small fee applies when uploading your own image. Payment conditions are detailed on the platform and prices are dependent on the output size of the image. Please allow 24 hours (working days) for the results and you will be notified by email or SMS.

FIND OUT MORE

DEDICATED SERVICE

Our dedicated customer service team is ready to respond to your sampling needs, stock and pricing enquiries.

Our expert sales teams, who specialise in your market areas, are available to assist with the detailed aspects of your product needs from price points to technical specification.

Our strategically located UK warehouse in Warwick is supported by a distributor network covering the entire country.

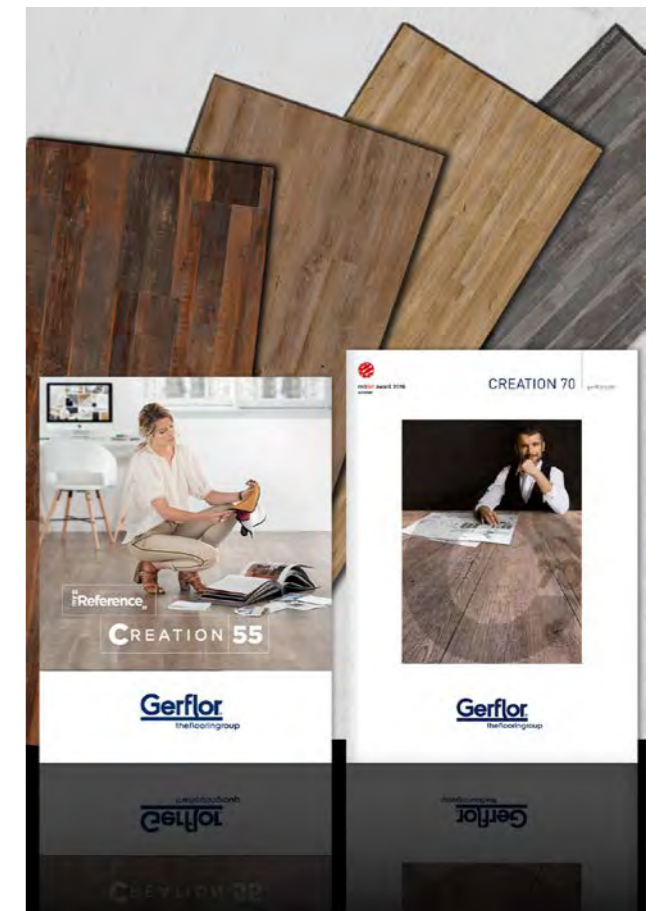

FREE SAMPLES

Free samples of our products are readily available on request and we aim to process your order within 24 hours. Contact us now for samples to create mood boards or for larger samples for all your flooring needs.
